

OSM Environmental Policy

Environmental Vision

At OSM we strive to drive our customer's sales through providing customized product solutions with inbox, retail or lifecycle value. It is our intention and goal to continuously limit and reduce in an economically sensible way the possible negative impact that our products have on the environment. The goal of our continuous efforts is to take the lead within our peer group and be the preferred vendor to all our customers sharing our Environmental goal and vision.

To achieve this we need to;

- Meet or exceed customers requirements and expectations
- Ensure understanding and awareness of environmental issues among all employees
- To continuously educate and train our employees
- Comply with all applicable environmental regulations
- Cooperate with both our product development and supply chain in order to ensure maximum environmental control
- Report progress and key issues at the Management Review Meetings and seek support and approval of relevant business and action plans in this area

Michel Bracké
Chief Executive Officer
